Subtraction... Find the difference

2018-2019

Math booklet

NAME: _____

How to use this booklet for Homework

This is the booklet intended for students to learn their basic subtraction facts.

It is expected that by grade 5 Students are able to answer orally 20 basic subtraction fact questions in less than a minute and a half.

We are learning strategies instead of straight memorization as it has been shown in numerous studies that students that can recall efficiently basic facts with the help of strategies are more likely to extend those basic facts to their problem solving questions.

I highly recommend that 10-15 minutes is spent every night (Monday-Thursday) to practice these questions orally.

This booklet should be done in order. The strategies appear as they have been taught and are generally in order of easiest to hardest.

Have fun learning some math with your child!
